

SPRINGBOK HANDLE

PUT SOME SPRING BACK IN YOUR STEP.

KEY FEATURES

- Assists in standing up
- Springs out of the way when not needed
- Suitable for fixed canes or folding sticks

The Springbok Handle adds a second handle to your walking stick, making it easier for users to stand up, by placing the walking stick centrally and using both hands to push up. It easily attaches to a wide range of walking stick diameters, from 12 - 22.5mm. It is ideal for standing up from a seat, getting out of a car or after kneeling down for gardening. The comfortable handle springs out of the way when not needed so you can't catch it on anything. An essential extra for every walking stick.
